

# **Scripting language I (LS1)**

**Final exam**

**Name:** \_\_\_\_\_

**Mark:** \_\_\_\_\_ / 25

In a HTML document :

/1

- Create a HTML5 structure.
- Link a JavaScript non-existing external file named «script.js».

## Tasks:

In the same HTML document, create a program that will ask the user to supply as many names as wanted using one button and to view the list of all names supplied using the other button :

- **Create two buttons** («Add names» and «View list»).
- **Create two functions** («names» and «list»).

- **Function «names» :**

/10

- Asks the user to supply as many names as wanted.  
When done (entering no more names), the function stops.
- Names shall be stored in an array.

- **Function «list» :**

/10

- Retrieves all the names of the array.
- Shows the name in a message window (one name per line).

- **Use the buttons to call the proper functions.**
